SC-1 Silt Fence (SF)

SILT FENCE INSTALLATION NOTES
1. Silt fence shall be installed in accordance with the following requirements:
a. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
b. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
c. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
d. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
e. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
f. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
g. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
h. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
i. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
j. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
k. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
l. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
m. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
n. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
o. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
p. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
q. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
r. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
s. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
t. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
u. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
v. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
w. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
x. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
y. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
z. Silt fence shall be installed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.

MM-1 Concrete Washout Area (CWA)

CONCRETE WASHOUT AREA
1. The concrete washout area shall be constructed in accordance with the following requirements:
a. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
b. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
c. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
d. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
e. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
f. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
g. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
h. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
i. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
j. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
k. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
l. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
m. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
n. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
o. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
p. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
q. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
r. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
s. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
t. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
u. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
v. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
w. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
x. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
y. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.
z. The concrete washout area shall be constructed in a trench 18" deep and 12" wide. The trench shall be backfilled with compacted material.

GRADING AND DRAINAGE NOTES:

1. CONTRACTOR TO FIELD VERIFY ALL EXISTING UNDERGROUND UTILITIES PRIOR TO CONSTRUCTION. REFER TO GENERAL NOTES FOR UTILITY LOCATION AND PROTECTION.
2. REFER TO HORIZONTAL CONTROL PLAN FOR FURTHER INFORMATION REGARDING ELEVATIONS AND FINISHED GRADES.
3. CONTRACTOR IS RESPONSIBLE FOR RESTORING ALL DISTURBED AREAS TO THEIR ORIGINAL CONDITIONS.
4. ALL SLOPES ARE TO BE FINISHED GRADE OR FLOWLINE.
5. ALL SLOPES SHALL BE FINISHED TO MEET THE FOLLOWING:
 - a. 4:1 SLOPES TO BE FINISHED TO THE FINISHED GRADE ADJACENT TO THE HIGH SIDE OF THE WALL.
 - b. 2:1 SLOPES TO BE FINISHED TO THE FINISHED GRADE ADJACENT TO THE LOW SIDE OF THE WALL.
 - c. REFER TO ARCH PLANS/DETAILS FOR WALL ELEVATIONS BEYOND THE ADJACENT FINISHED GRADES (EMPOVED WALL, C&P/FOOTER, ETC).
