SYSTEC101 provides copper cabling, fiber optic cabling, access control, and business phone systems to meet your specific needs. SYSTEC101 was established in 2014, as an Information Technology service provider for small and medium size businesses. Over the years, SYSTEC101 shifted towards structured cabling systems and soon completed hundreds of projects, from single office spaces to campuses. gained experience and certifications to provide Structured Cabling Design, installation and maintenance services to school districts, retail stores and office spaces. Now, SYSTEC101 has the ability to design, install, troubleshoot, and maintain various aspects of information and communication systems, including fiber optic networks, distributed antenna systems, and network cabling.

Core

Information and Communication
 Systems Design and Installation

competencies

Fiber Optic Cabling Troubleshooting
 and Maintenance

Distributed Antenna Systems (DAS)
 Design and Installation

Network Cabling
 Service Calls

differentiators

- ▶ BICSI RCDD, BICSI Technician, MTA Certifications
- ▶ Efficiency in Design and Estimation
- ▶ Centralized Project Tracking
- ▶ Proprietary Web Tool

Client

- ▶ Adams County School District Wireless AP Cabling Project and Fiber Optic Backbone Cabling Project

experience

- ▶ Kroger Aurora Facility DAS System
- ▶ Stryker combined office space network cabling
- ▶ Denver Apartment complex wireless implementation
- ▶ TJ Maxx security cameras upgrade
