I am excited to introduce SYSTEC101, LLC as a premier provider of technology infrastructure solutions. Founded in 2013, our company has evolved from a low voltage BICSI contractor to a successful business dedicated to delivering high-quality services, including copper and fiber optic cabling, access control, video surveillance, and business phone systems.

We are particularly interested in bidding on the latest Structured Cabling System addition for Louisa County Middle School. Our extensive experience and commitment to quality make us a strong candidate for this project.

To date, we have installed over two million feet of Cat6 cable and thousands of fiber optic cables in various environments, both indoor and outdoor. Our operations span across two locations—Aurora, CO, and Albany, NY—and we serve clients nationwide, including federal agencies.

SYSTEC101 not only installs structured cabling components but also manufactures and markets a comprehensive range of these components under our brand name, SYSTEC101. This backward integration allows us to maintain quality control and streamline our processes.

For this project, we propose using Ortronics components, as specified in your request. Our extensive experience with Ortronics products in projects across the country ensures we can deliver the highest standards of installation. Furthermore, our capabilities extend beyond structured cabling; we also specialize in designing and installing Audio-Visual Systems, Camera Systems, Clock Systems, and Vape

Detection Systems. This comprehensive skill set positions us as a one-stop shop for all your technology infrastructure needs.

We are eager to share our expertise and collaborate on this project. Please find additional information attached, and feel free to reach out with any questions. We look forward to the opportunity to work with Louisa County Public Schools.

Thank you for considering SYSTEC101, LLC.

Best regards,

Murat Yildirim
