ATTACHMENT C

12. Description of Contract Work. In order to establish the relevance of your project to the instant requirement, please describe the scope, magnitude and complexity of this work, comparing and contrasting it to that required under this solicitation. Additionally, describe any unique or unusual requirements of the contract, and performance problems or issues encountered under the performance of the contract. Include discussion of any previous or ongoing Department of Labor investigations of your firm for Service Contract Act or other labor related violations. For problems/issues noted, describe the method of resolution and/or corrective actions taken. Use a continuation sheet, if necessary.

No Department of Labor Investigations on any of our projects from the day of inhibition and till date.

During the Student Housing Cabling Upgrade project at Trinidad State College, we faced a unique challenge regarding core penetrations needed for running our cables to each floor. Typically, these penetrations fall under the scope of the Electrical Contractor or General Contractor. However, in this case, the college was not utilizing a General Contractor and was not undergoing any renovations.

Recognizing the potential for this issue to lead to a change order, we proactively raised the question about core drilling during the bid phase. The college ultimately requested that we handle the core penetrations ourselves. By anticipating this need and including it in our project scope, we ensured that our installation remained functional without any additional costs or delays.

Also, In this project we had a really tight timeline and wanted to keep our costs under control. Our project management team made a thorough site survey and got all the necessary information, access and clearances which paved the way for our technicians to execute the entire project within the stipulated timeline.

We pride ourselves on including all necessary components to deliver a complete and functional system. We only exclude items or scope when we have confirmed information that they will be managed by the owner, district, or other subcontractors. This proactive approach not only protects our budget but also reinforces our commitment to delivering value to our clients.
