## ATTACHMENT C

**12. Description of Contract Work.** In order to establish the relevance of your project to the instant requirement, please describe the scope, magnitude and complexity of this work, comparing and contrasting it to that required under this solicitation. Additionally, describe any unique or unusual requirements of the contract, and performance problems or issues encountered under the performance of the contract. Include discussion of any previous or ongoing Department of Labor investigations of your firm for Service Contract Act or other labor related violations. For problems/issues noted, describe the method of resolution and/or corrective actions taken. Use a continuation sheet, if necessary.

No Department of Labor Investigations on any of our projects from the day of inhibition and till date.

We executed the below listed scope of work in this project:

- Pulling, termination and labeling of all horizontal cabling using CAT6 plenum rated cable with keystone jacks installed in surface mount boxes on the far end.
- Termination of the near end cables to patch panels on each floor which will be connected to the network switches.
- Installation of 36 Fortinet access points throughout four floors of Building L according to the locations specified in the attached pre-installation wireless coverage report. Access points will be placed based on the recommended locations to ensure optimal wireless coverage.
- Mounting, installation and labeling of the provided network equipment including switches, routers, outdoor antenna, cables and hardware.
- Installation of the backbone cabling between the network switches located on each floor using CAT6a cables to future proof the infrastructure. The backbone cabling topology will be a star topology. Ensuring connectivity of all equipment to the Fortinet controller as verified by a Fortinet technician.
- Provision of any additional required hardware such as inserts, cables, patch panels.
- Installation of outdoor antennas as needed in the optimal locations as determined by scanning Verizon signals using Wilson Pro Cellular scanner tool. External antenna and the cabling will be grounded to prevent damages from lightning and unwanted signal coupling.
- Certification of all installed cables using a Fluke DSX-8000 certifier to ensure compliance with specifications.
- Scheduling of a project kick-off meeting within 15 days of contract award and provision of a timeline.
- Delivery of all documentation including as-builts, photos and equipment inventory within 15 days of completion.
