## ADDENDUM NUMBER 1

### FOR

## PUBLIC BID NUMBER 24-070 Fiber Cable Replacement - Elementary and Middle Schools - E-Rate Compliant

This addendum is being issued for the following reasons:

Response to clarification question: Question: Can Distances / footage be provided?

The exact distance is unknown because these cable runs are at least 25 years old. We don't have a meter to measure distance on multimode fiber. What we can say is that all the OM1 fiber lengths are between 33 and 100 meters. We know they are longer than 33 meters because 10GB multimode fiber transceivers don't work. We know they are shorter than 100 meters because 1GB multimode fiber transceivers work flawlessly. Unfortunately, because this is a production network, we can not disconnect the fiber to put a meter on it to get an exact reading while the staff and students are in school.

The date and time for the Bid Opening remains unchanged at January 14, 2025, at 2:15 P.M., Prevailing Local Time

This addendum is dated and issued as of Tuesday, December 17, 2024

All other terms and conditions remain unchanged.
